

Procedures for the preparation of Platform deliverables

The procedures for the preparation of Platform deliverables have been adopted by the Plenary in decision IPBES-3/3 and are contained in Annex I to this decision.

	Review editors	23
	4. Preparation of summaries for policy makers	23

5. Preparation of synthesis reports..... 23

1. Definitions

The definitions of terms used in this document are as follows:

1.1 Governance structures

“**Platform**” means the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services.

“**Plenary**” means the Platform’s decision-making body, comprising all the members of the Platform.

“**Bureau**” refers to the body of elected members of the Bureau of the session of the Plenary as set forth in the rules of procedure for the Plenary of the Platform.¹

“**Multidisciplinary Expert Panel**” refers to the subsidiary body established by the Plenary that carries out the scientific and technical functions agreed upon by the Plenary, as articulated in the functions, operating principles and institutional arrangements of the Platform (UNEP/IPBES.MI/2/9, annex I, appendix I).

“**Session of the Plenary**” means any ordinary or extraordinary session of the Platform’s Plenary.

1.2 Deliverables

“**Reports**” means the main deliverables of the Platform, including assessment reports and synthesis reports, their summaries for policymakers and technical summaries, technical papers and technical guidelines.

“**Assessment reports**” are published assessments of scientific, technical and socioeconomic issues that take into account different approaches, visions and knowledge systems, including global assessments of biodiversity and ecosystem services, regional and subregional assessments of biodiversity and ecosystem services with a defined geographical scope, and thematic or methodological assessments based on the standard or the fast-track approach. They are to be composed of two or more sections including a summary for policymakers, an optional technical summary and individual chapters and their executive summaries.

“**Synthesis reports**” synthesize and integrate materials drawing from assessment reports, are written in a non-technical style suitable for policymakers and address a broad range of policy-relevant questions. They are to be composed of two sections: a summary for policymakers, and a full report.

“**Summary for policymakers**” is a component of any report providing a policy-relevant but not policy-prescriptive summary of that report.

“**Technical summary**” is a longer detailed and specialized version of the material contained in the summary for policymakers.

“**Technical papers**” are based on the material contained in the assessment reports and are prepared on topics deemed important by the Plenary.

“**Supporting material**” is material that has been prepared for the Platform and may include the following:

(a) Dialogue reports based on the material generated by discussions, which may include intercultural and inter-scientific dialogue, at the regional and subregional levels, among members of academic, indigenous peoples, local and civil society organizations and which take into account the different approaches, visions and knowledge systems that exist as well as the various views and approaches to sustainable development;

(b) Reports and proceedings of workshops and expert meetings that are either commissioned or supported by the Platform;

(c) Software or databases that facilitate the preparation or use of the Platform’s reports;

(d) Policy-relevant tools and methodologies that facilitate the preparation or use of the Platform’s reports;

(e) Guidance materials (guidance notes and guidance documents) that assist in the preparation of comprehensive and scientifically sound Platform reports and technical papers.

¹ IPBES/1/12, annex I.

1.3 Clearance processes

“**Validation**” of the Platform’s reports is a process by which the Multidisciplinary Expert Panel and the Bureau provide their endorsement that the processes for the preparation of Platform reports have been duly followed.

“**Acceptance**” of the Platform’s reports at a session of the Plenary signifies that the material has not been subjected to section-by-section or line-by-line discussion and agreement by the Plenary but nevertheless presents a comprehensive and balanced view of the subject matter.

“**Adoption**” of the Platform’s reports is a process of section-by-section (and not line-by-line) endorsement, as described in section 3.9, at a session of the Plenary.

“**Approval**” of the Platform’s summaries for policymakers signifies that the material has been subject to detailed, line-by-line discussion and agreement by consensus at a session of the Plenary.

“**Preliminary acceptance, adoption and approval**” of regional reports will be undertaken by the relevant regional representatives at a session of the Plenary, and such reports will then be further reviewed and may be accepted, adopted and approved by the Plenary as a whole.

Acceptance, adoption and approval are done by consensus.

2. Overview of clearance processes for the Platform’s deliverables

The various deliverables as defined in section 1.2 are subject, as appropriate, to different levels of formal endorsement. These levels are described in terms of acceptance, adoption and approval, as defined in section 1, as follows:

(a) In general, Platform reports are accepted and their summaries for policymakers are approved by consensus by the Plenary. Technical summaries are accepted by the Plenary. Regional and subregional reports and their summaries for policymakers are preliminarily accepted and approved by the relevant regional representatives of the Plenary and subsequently accepted and approved by the Plenary. In the case of the synthesis report, the Plenary adopts the full report, section by section, and approves its summary for policymakers. The definition of the terms “acceptance”, “adoption” and “approval” will be included in the Platform’s published reports;

(b) Technical papers are not accepted, approved or adopted by the Plenary, but are finalized by the authors in consultation with the Multidisciplinary Expert Panel, which performs the role of an editorial board;

(c) Supporting materials are not accepted, approved or adopted.

Clearance processes for Platform deliverables

<i>Platform deliverables</i>	<i>Validation</i>	<i>Acceptance</i>	<i>Adoption</i>	<i>Approval</i>
Assessments				
• Thematic and methodological assessment reports (based on standard or fast-track approach)	MEP/Bureau	Plenary	N/A	N/A
• Thematic and methodological assessment SPMs (based on standard or fast-track approach)	MEP/Bureau	N/A	N/A	Plenary
• Regional/subregional assessment reports	MEP/Bureau	Plenary	N/A	N/A
• Regional/subregional assessment SPMs	MEP/Bureau	N/A	N/A	Plenary

Abbreviations: MEP, Multidisciplinary Expert Panel; N/A, not applicable; SPM, summary for policymakers.

3. Procedures for the preparation of the Platform's deliverables

3.1 Standard approach for thematic or methodological assessments

(a) Consistent with decision IPBES/1/3 the requests, inputs and suggestions received by the secretariat will be considered and prioritized by the Multidisciplinary Expert Panel and the Bureau, in accordance with paragraphs 7 and 9 of decision IPBES/1/3; this process may include an initial scoping, including feasibility and estimated cost;

(b) The Multidisciplinary Expert Panel and the Bureau will prepare a report containing a prioritized list of requests, with an analysis of the scientific and policy relevance of the requests as referred to in paragraph 7 of decision IPBES/1/3, including the implications of the requests for the Platform's work programme and resource requirements;

(c) Should the Multidisciplinary Expert Panel and the Bureau conclude that additional scoping is required to complete the prioritization of certain requests, the Multidisciplinary Expert Panel will submit a proposal to that end to the Plenary for consideration and decision together with the list and analysis referred to in subparagraph (b) above;

(d) If the Plenary approves detailed scoping, it will then need to decide whether to request the Multidisciplinary Expert Panel to submit a detailed scoping study for the Plenary's review and decision to proceed with an assessment or whether instead to request the Multidisciplinary Expert Panel to proceed with an assessment, with an agreed budget and timetable, following the completion of the detailed scoping study;

(e) If the Plenary approves the issue for detailed scoping, the Multidisciplinary Expert Panel, through the secretariat, will request nominations from Governments and invite relevant stakeholders² to present names of experts to assist with the scoping. The secretariat will compile the lists of nominations, which will be made available to Multidisciplinary Expert Panel;

(f) The Multidisciplinary Expert Panel will then select experts from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent, and then oversee the detailed scoping, including outline, costs and feasibility;

(g) If the Plenary has requested the Multidisciplinary Expert Panel to proceed to an assessment, the detailed scoping report is sent to members of the Platform for review and comment over a four-week period and made available on the Platform website;

(h) Based on the results of the detailed scoping exercise and comments received from members of the Platform and other stakeholders, the Multidisciplinary Expert Panel and the Bureau decide whether to proceed with the assessment, assuming that it can be conducted within the budget and timetable approved by the Plenary. If however, the Panel and the Bureau conclude that the assessment should not go forward, they will so inform the Plenary for its review and decision;

(i) If the decision is to proceed with the assessment, the Multidisciplinary Expert Panel requests nominations from Governments and invites relevant stakeholders to present names of experts to contribute to the preparation of the report;

(j) The Multidisciplinary Expert Panel selects the report co-chairs, coordinating lead authors, lead authors and review editors using the selection criteria (section 3.6.2) from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent;

(k) The report co-chairs, coordinating lead authors and lead authors prepare the first draft of the report;

(l) The first draft of the report is peer reviewed by experts in an open and transparent process;

(m) The report co-chairs, coordinating lead authors and lead authors prepare the second draft of the report and the first draft of the summary for policymakers under the guidance of the review editors and the Multidisciplinary Expert Panel;

² In the context of these procedures, relevant stakeholders are qualified national, regional and international scientific organizations, centres of excellence and institutions known for their work and expertise, including experts on indigenous and local knowledge on issues related to the Platform's functions and programme of work.

- (n) The second draft of the report and the first draft of the summary for policymakers are reviewed concurrently by both Governments and experts in an open and transparent process;
- (o) The report co-chairs, coordinating lead authors and lead authors prepare final drafts of the report and the summary for policymakers under the guidance of the review editors and the Multidisciplinary Expert Panel;
- (p) The summary for policymakers is translated into the six official languages of the United Nations and prior to distribution is checked for accuracy by the experts involved in the assessments;
- (q) The final drafts of the report and the summary for policymakers are sent to Governments for final review and made available on the Platform website;
- (r) Governments are strongly encouraged to submit written comments to the secretariat at least two weeks prior to any session of the Plenary;
- (s) The Plenary reviews and may accept the report and approve the summary for policymakers.

3.2 Fast-track approach for thematic and methodological assessments

- (a) Consistent with decision IPBES/1/3 the requests, inputs and suggestions for assessments, including those specifically requested for fast-track treatment, received by the secretariat will be considered and prioritized by the Multidisciplinary Expert Panel and the Bureau in accordance with paragraphs 7 and 9 of decision IPBES/1/3; this process may include an initial scoping, including feasibility and estimated cost;
- (b) The Multidisciplinary Expert Panel and the Bureau will prepare a report containing a prioritized list of assessments to be developed using a fast-track approach, with an analysis of the scientific and policy relevance of the requests as referred to in paragraph 7 of decision IPBES/1/3, including the implications of the requests for the Platform's work programme and resource requirements;
- (c) If the Multidisciplinary Expert Panel and Bureau agree that the Plenary may deem an issue to be an important issue for fast-track assessment, the Panel, in conjunction with the Bureau, identifies a small team of experts to assist the Panel in scoping the proposed issue, including feasibility and cost;
- (d) The Plenary reviews the scoping and decides whether to approve or reject the undertaking of the fast-track assessments. The Plenary based on the advice of the Panel may also decide that a fast-track approach involving a robust review procedure is appropriate for a topic given the level of complexity of the issue concerned. If the Plenary does not approve the fast tracking of an assessment it can be considered under the standard approach;
- (e) If the Plenary approves an issue for fast-track assessment, the Multidisciplinary Expert Panel will request nominations from Governments and invite relevant stakeholders³ to present names of experts to contribute to the preparation of the report based on the scope developed during the Multidisciplinary Expert Panel scoping exercise;
- (f) The Multidisciplinary Expert Panel will select the report co-chairs, coordinating lead authors, lead authors and review editors using the selection criteria (section 3.6.2) from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent;
- (g) The report co-chairs, coordinating lead authors and lead authors prepare first drafts of the report and the summary for policymakers;
- (h) The first drafts of the report and the summary for policymakers are reviewed by Governments and experts in an open and transparent process;
- (i) The report co-chairs, coordinating lead authors and lead authors revise the first drafts of the report and the summary for policymakers with the guidance of the review editors and the Multidisciplinary Expert Panel;

³ Ibid.

(j) The summary for policymakers is translated into the six official languages of the United Nations and prior to distribution is checked for accuracy by the experts involved in the assessments;

(k) The final drafts of the report and the summary for policymakers are sent to Governments for final review and made available on the Platform website;

(l) The Plenary reviews and may accept the report and approve the summary for policymakers.

3.3 Approach for regional, subregional or global assessments

(a) Consistent with decision IPBES/1/3 the requests, inputs and suggestions received by the secretariat will be considered and prioritized by the Multidisciplinary Expert Panel and the Bureau in accordance with paragraphs 7 and 9 of decision IPBES/1/3; this process may include an initial scoping, including feasibility and estimated cost;

(b) The Multidisciplinary Expert Panel and the Bureau will prepare a report containing a prioritized list of requests, with an analysis of the scientific and policy relevance of the requests as referred to in paragraph 7 of decision IPBES/1/3, including the implications of the requests for the Platform's work programme and resource requirements;

(c) Should the Multidisciplinary Expert Panel and the Bureau conclude that additional scoping is required to complete the prioritization of certain requests, the Multidisciplinary Expert Panel will submit a proposal to that end to the plenary for consideration and decision together with the list and analysis referred to in subparagraph (b) above;

(d) The Plenary reviews the initial scoping and decides to approve or reject the undertaking of a detailed scoping of one or more of the proposed assessments;

(e) If the Plenary approves an issue for a detailed scoping, the Multidisciplinary Expert Panel, through the secretariat, will request nominations from Governments and invite relevant stakeholders⁴ to present names of experts to assist with the scoping. For regional and subregional assessments emphasis is placed on expertise from, as well as relevant to, the geographic region under consideration. The secretariat will compile the lists of nominations, which will be made available to the Multidisciplinary Expert Panel;

(f) The Multidisciplinary Expert Panel will then select experts from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent. For regional and subregional assessments, the Panel will, in particular, take into account the views of the Panel members from the relevant regions as well as those with experience with the geographic region under consideration;

(g) The Multidisciplinary Expert Panel and the Bureau oversee a detailed scoping, including outline, costs and feasibility;

(h) The detailed scoping report is sent to the secretariat for distribution to Governments and experts in an open and transparent process for consideration at the following session of the Plenary; if the Plenary decides, based on the detailed scoping report, to approve the preparation of the report, the Multidisciplinary Expert Panel will request nominations from Governments and invite relevant stakeholders to present names of experts to contribute to the preparation of the report;

(i) The Multidisciplinary Expert Panel will select the report co-chairs, coordinating lead authors, lead authors and review editors using the selection criteria (section 3.6.2) from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent. The Multidisciplinary Expert Panel will, in particular, take into account the views of the Panel members from the relevant region as well as those with experience with the geographic region under consideration;

(j) The report co-chairs, coordinating lead authors and lead authors prepare the first draft of the report;

(k) The first draft of the report is peer reviewed by experts in an open and transparent process. The review of regional and subregional reports will emphasize the use of expertise from, as well as relevant to, the geographic regions under consideration;

⁴ Ibid.

- (l) The report co-chairs, coordinating lead authors and lead authors prepare the second draft of the report and the first draft of the summary for policymakers with the guidance of the review editors and the Multidisciplinary Expert Panel;
- (m) The second draft of the report and the first draft of the summary for policymakers are reviewed concurrently by both Governments and experts in an open and transparent process;
- (n) The report co-chairs, coordinating lead authors and lead authors prepare the final drafts of the report and the summary for policymakers with the guidance of the review editors and the Multidisciplinary Expert Panel;
- (o) The summary for policymakers is translated into the six official languages of the United Nations and prior to distribution is checked for accuracy by the experts involved in the assessments;
- (p) The final drafts of the report and the summary for policymakers are sent to Governments for final review and made available on the Platform website;
- (q) Governments are strongly encouraged to submit written comments on the final draft of the summary for policymakers at least two weeks prior to any session of the Plenary;
- (r) The Plenary reviews and may accept the report and approve the summary for policymakers.

3.4 Scoping for Platform deliverables

Scoping is the process by which the Platform will define the scope and objective of a deliverable and the information and human and financial requirements to achieve the objective. There are three types of scoping process, of varying complexity:

- (a) Pre-scoping is the examination of preliminary scoping material, usually provided by the body making the original request for assessment;
- (b) Initial scoping is a scoping process carried out by the Multidisciplinary Expert Panel (for scientific issues) and the Bureau (for administrative issues); it is obligatory before any proposal may be considered by the Plenary;
- (c) Full scoping is a detailed scoping process, overseen by the Multidisciplinary Expert Panel, involving a scoping workshop with the experts selected by the Panel:
 - (i) The scoping process should include the following scientific and technical elements:
 - a. Main issues related to biodiversity and ecosystem services to be covered by the assessment or other activities in relation to the Platform functions and its conceptual framework;
 - b. Main policy questions and users that might be addressed through the assessment or other activities;
 - c. Rationale and timeliness of the activity and how it will contribute to other processes or decisions;
 - d. Possible constituent chapters for any assessment report and the scope of each chapter;
 - e. Any known significant limitations in the existing knowledge that will hinder undertaking the assessment;
 - f. Potential additional activities and outputs that could be derived from an assessment and undertaken to support other functions of the Platform (e.g., capacity-building, policy support, etc.);
 - g. Evidence of the integration of the four Platform functions, e.g., scoping an assessment should look not only at existing knowledge and knowledge gaps, but also at existing capacity and capacity-building gaps and potentially at policy support tools and methodologies as well;
 - h. Methodologies to be used;
 - i. Geographic boundaries of the assessment;

- j. List of scientific disciplines, types of expertise and knowledge needed to carry out the assessment;
- (ii) Procedural or administrative elements to be incorporated in the scoping process might include:
 - a. Overall activity schedule and milestones;
 - b. Operational structures that might be necessary, and the roles and responsibilities of the various entities to be involved, including the identification of strategic partners in delivering the activity, and the means by which the procedures for the implementation of the work programme will be carried out to ensure effective peer review, quality assurance and transparency;
 - c. Estimated costs of the activity and potential sources of funding, including from the Platform trust fund and other sources, as appropriate;
 - d. Capacity-building interventions that may be required to deliver the activity, which might be included as activities in the general report delivery plan;
 - e. Communications and outreach activities that might be appropriate for the specific deliverable, including for the identification of gaps in knowledge and for policy support;
 - f. Consideration of data and information management for assessments;

(d) The full scoping is presented to the Plenary for its consideration. The Plenary will then decide whether or not to proceed with the preparation of the report.

Each of the Platform's global, regional and subregional assessment reports, thematic and methodological assessment reports and synthesis reports, as defined in section 1 of these procedures, should, except for those assessments approved for the fast-track process, be preceded by a full scoping exercise approved by the Plenary to develop the report's draft outline, explanatory notes and means of implementation, as appropriate.

In some instances, a fast-track approach to scoping may be considered appropriate for thematic or methodological assessments where a demand for policy-relevant information is deemed appropriate by the Plenary. This would involve undertaking the assessment on the sole basis of an initial scoping exercise, based on prior approval of the scoping by the Plenary.

3.5 General procedures for preparing Platform reports

In the case of assessment reports and synthesis reports, report co-chairs, coordinating lead authors, lead authors, reviewers and review editors of chapter teams are required to deliver technically and scientifically balanced assessments. Authors should use language that expresses the diversity of the scientific, technical and socioeconomic evidence, based on the strength of the evidence and the level of agreement on its interpretation and implications in the literature. Thus guidance on tackling uncertainties will be developed by the Multidisciplinary Expert Panel. Assessments should be based on publicly available and peer-reviewed literature, as well as reports and other materials, including indigenous and local knowledge, which is not published in the peer-reviewed literature but is available to experts and reviewers.

The working language of assessment meetings will normally be English. Subregional and regional assessment reports may be produced in the most relevant of the six official languages of the United Nations. All summaries for policymakers presented to the Plenary will be made available in the six official languages of the United Nations and checked for accuracy prior to distribution by the experts involved in the assessments.

The review process for Platform reports will generally comprise three stages:

- (a) Review by experts in an open and transparent manner of Platform reports;
- (b) Review by Governments and experts in an open and transparent manner of Platform reports and summaries for policymakers;
- (c) Review by Governments of summaries for policymakers and/or synthesis reports.

The Multidisciplinary Expert Panel and Bureau will ensure that the reports are scoped, prepared and peer reviewed in accordance with the present procedures.

The Multidisciplinary Expert Panel and the Bureau will assist the authors to ensure that the summary for policymakers includes the appropriate policy-relevant materials.

The report co-chairs and the Multidisciplinary Expert Panel will be responsible for ensuring that proper review of the material occurs in a timely manner as outlined in sections 3.1 and 3.3 for the standard approach to thematic and methodological assessments and regional, subregional or global assessments and section 3.2 for the fast-track approach to assessments.

Expert review should normally be allocated up to eight weeks, but not less than six weeks, except by decision of the Multidisciplinary Expert Panel. Government and expert reviews should not be allocated less than eight weeks, except by decision of the Bureau and Multidisciplinary Expert Panel (e.g., six weeks for a fast-track assessment). All written review comments by experts and Governments will be made available on the Platform website during the review process.

The following will be made available on the Platform's website as soon as possible after acceptance by the Plenary and the finalization of a report or technical paper:

- (a) Drafts of Platform reports and technical papers that have been submitted for formal expert and/or government review;
- (b) Government and expert review comments;
- (c) Author responses to those comments.

The Platform considers its draft reports, prior to their acceptance, adoption and approval by the Plenary, to be provided in confidence to reviewers and to be not for public distribution, quotation or citation.

3.6 Preparation of reports

3.6.1 Compilation of lists of potential report co-chairs, coordinating lead authors, lead authors, review editors and of government-designated national focal points

The Multidisciplinary Expert Panel, through the Platform secretariat, will request nominations from Governments and invite relevant stakeholders to present names of experts to act as potential coordinating lead authors, lead authors or review editors to participate in the preparation of reports.

The tasks and responsibilities of report co-chairs, coordinating lead authors, lead authors, review editors and government-designated national focal points are outlined in annex I to the present procedures. To facilitate the nomination of experts and later review of reports by Governments, Governments should designate Platform national focal points responsible for liaising with the secretariat.

3.6.2 Selection of report co-chairs, coordinating lead authors, lead authors and review editors

Report co-chairs, coordinating lead authors, lead authors and review editors are selected by the Multidisciplinary Expert Panel from the lists of nominations, of which experts selected from those presented by relevant stakeholders should not exceed twenty per cent.

The composition of the group of coordinating lead authors and lead authors for a given chapter, report or summary should reflect the range of scientific, technical and socioeconomic views and expertise; geographical representation, with appropriate representation of experts from developing and developed countries and countries with economies in transition; the diversity of knowledge systems that exist; and gender balance. The Multidisciplinary Expert Panel will inform the Plenary on the selection process and the extent to which the above-mentioned considerations were achieved therein, and on the persons appointed to the positions of report co-chairs, coordinating lead authors, lead authors and review editors for the various chapters. Every effort should be made to engage experts from the relevant regions on the author teams for chapters that deal with specific regions, but experts from other regions may be engaged when they can provide an important contribution to an assessment.

The coordinating lead authors and lead authors selected by the Multidisciplinary Expert Panel may enlist other experts as contributing authors to assist with the work.

3.6.3 Preparation of draft reports

The preparation of the first draft of a report should be undertaken by report co-chairs, coordinating lead authors and lead authors. The report co-chairs, through the secretariat, should make available

information on the topics to be covered by the assessment and the time frame for contributing materials.

Experts who wish to contribute material for consideration in the first draft should submit it directly to the lead authors. Such contributions should be supported as far as possible with references from the peer-reviewed and internationally available literature as well as with copies of any unpublished material cited and outputs deriving from indigenous and local knowledge. Clear indications of how to access such material should be included in the contributions. For material available in electronic format only, the location where such material may be accessed and a soft copy of such material should be sent to the secretariat for archiving.

Lead authors will work on the basis of these contributions as well as the peer-reviewed and internationally available literature. Unpublished material, and outputs deriving from indigenous and local knowledge, may be used in assessments, provided that their inclusion is fully justified in the context of the Platform's assessment process and that their unpublished status is specified. Such materials will need to be made available for the review process and their sources identified by the report co-chairs, who will ensure that appropriate knowledge and data safeguards are in place.

Procedures, approaches and participatory processes for working with indigenous and local knowledge systems will be developed by the Platform's Task Force on Indigenous and Local Knowledge for consideration by the Plenary at its fourth session. Preliminary guidelines were presented and reviewed at the third session of the Plenary in order to inform the various assessments and to incorporate the lessons learned in fulfilling deliverable 1 (c) of the work programme for 2014–2018. Detailed guidelines for the use of literature in Platform assessments will be developed by the Multidisciplinary Expert Panel for consideration by the Platform at its fourth session.

In preparing the first draft of a report and at subsequent stages of revision after review, lead authors should clearly identify disparate views for which there is significant scientific, technical or socioeconomic support, together with the relevant arguments. Sources of uncertainty should be clearly identified, listed and quantified where possible. The implications for decision-making of the findings, including knowledge gaps, contrasting evidence and minority opinions, should be explicitly discussed. Technical summaries will be prepared, if deemed necessary by the Multidisciplinary Expert Panel, under the leadership of the Panel.

3.6.4 Review

Three principles govern the review process: first, the Platform's reports should represent the best possible scientific, technical and socioeconomic advice and be as balanced and comprehensive as possible. Second, as many experts as possible should be involved in the review process, ensuring representation of independent experts (i.e., experts not involved in the preparation of the chapters they are to review) from all countries. Third, the review process should be balanced, open and transparent and record the response to each review comment.

The Multidisciplinary Expert Panel should normally select two review editors per chapter (including for the chapter's executive summary) and per technical summary of each report based on the lists of experts nominated as described in section 3.6.2.

Review editors should not be involved as authors or reviewers of material for which they will act as review editors. Review editors should be selected from among nominees from developed and developing countries and countries with economies in transition, with a balanced representation of scientific, technical and socioeconomic expertise.

Report co-chairs should arrange a comprehensive review of reports in each review phase, seeking to ensure complete coverage of all content. Sections of a report that deal with issues similar to issues addressed in other reports should be cross-checked through the relevant authors and report co-chairs.

3.6.4.1 First review (by experts)

The first draft of a report should be circulated by the Multidisciplinary Expert Panel through the secretariat for review.

Governments should be notified of the commencement of the first review process. The first draft of a report should be sent by the secretariat to government-designated national focal points for information purposes. A full list of reviewers should be made available on the Platform's website.

The secretariat should make available to reviewers on request during the review process any specific material referenced in the document being reviewed that is not available in the internationally published literature.

Expert reviewers should provide their comments to the appropriate lead authors through the secretariat.

3.6.4.2 Second review (by Governments, experts, in an open and transparent manner)

The second draft of the report and the first draft of the summary for policymakers should be distributed concurrently by the Platform secretariat to Governments through the government-designated national focal points, the Bureau of the Plenary, the Multidisciplinary Expert Panel and the report co-chairs, coordinating lead authors, lead authors, contributing authors and expert reviewers.

Government focal points should be notified of the commencement of the second review process some six to eight weeks in advance. Governments should send one integrated set of comments for each report to the secretariat through their government-designated national focal points. Experts should send their comments for each report to the secretariat.

3.6.4.3 Preparation of a final draft of a report

The preparation of a final draft of a report that reflects comments made by Governments and experts, for submission to the Plenary for acceptance, should be undertaken by report co-chairs, coordinating lead authors and lead authors in consultation with the review editors. If necessary, the Multidisciplinary Expert Panel working with authors, review editors and reviewers can try to resolve areas of major differences of opinion.

Reports should describe different, possibly controversial, scientific, technical and socioeconomic views on a given subject, particularly if they are relevant to the policy debate. The final draft of a report should credit all report co-chairs, coordinating lead authors, lead authors, contributing authors, reviewers and review editors and other contributors, as appropriate, by name and affiliation, at the end of the report.

3.7 Acceptance of reports by the Plenary

Reports presented for acceptance at sessions of the Plenary are the full scientific, technical and socioeconomic assessment reports. The subject matter of these reports shall conform to the terms of reference and to the workplan approved by the Plenary or the Multidisciplinary Expert Panel as requested. Reports to be accepted by the Plenary will have undergone review by Governments and experts. The purpose of these reviews is to ensure that the reports present a comprehensive and balanced view of the subjects they cover. While the large volume and technical detail of this material places practical limitations upon the extent to which changes to the reports may be made at sessions of the Plenary, "acceptance" signifies the view of the Plenary that this purpose has been achieved. The content of the chapters is the responsibility of the coordinating lead authors and is subject to Plenary acceptance. Other than grammatical or minor editorial changes, after acceptance by the Plenary only changes required to ensure consistency with the summary for policymakers shall be accepted. Such changes shall be identified by the lead author in writing and submitted to the Plenary at the time it is asked to approve the summary for policymakers.

Reports accepted by the Plenary should be formally and prominently described on the front and other introductory covers as a report accepted by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services.

3.8 Preparation and approval of summaries for policymakers

Summaries for policymakers for global, regional, subregional and thematic and methodological assessments should be subject to simultaneous review by Governments and experts. Written comments

by Governments on revised drafts should be submitted to the secretariat through the government-designated national focal points⁵ before final approval by the Plenary. Regional summaries for policymakers should, as a preliminary step, be approved by their respective regional members of the Platform prior to further review and approval by the Plenary.

Responsibility for preparing first drafts and revised drafts of summaries for policymakers lies with the report co-chairs and an appropriate representation of coordinating lead authors and lead authors, overseen by the Multidisciplinary Expert Panel and the Bureau. The summaries for policymakers should be prepared concurrently with the main reports.

The first review of a summary for policymakers will take place during the same period as the review of the second draft of a report by Governments and experts in an open and transparent manner.

The final draft of a summary for policymakers will be circulated for a final round of comments by Governments in preparation for the session of the Plenary at which it will be considered for approval.

Approval of a summary for policymakers signifies that it is consistent with the factual material contained in the full scientific, technical and socioeconomic assessment accepted by the Plenary.

Report co-chairs and coordinating lead authors should be present at sessions of the Plenary at which the relevant summary for policymakers is to be considered in order to ensure that changes made by the Plenary to the summary are consistent with the findings in the main report. The summaries for policymakers should be formally and prominently described as reports of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services.

3.9 Preparation, approval and adoption of synthesis reports by the Plenary

Synthesis reports that are approved and adopted by the Plenary provide a synthesis of assessment reports and other reports as decided by the Plenary.

Synthesis reports integrate materials contained in the assessment reports. They should be written in a non-technical style suitable for policymakers and address a broad range of policy-relevant questions as approved by the Plenary. A synthesis report comprises two sections: a summary for policymakers, and a full report.

The Multidisciplinary Expert Panel will agree on the composition of the writing team, which could consist, as appropriate, of report co-chairs, coordinating lead authors, and Panel and Bureau members. In selecting the writing team for a synthesis report, consideration should be given to the importance of the full range of scientific, technical and socioeconomic views and expertise; appropriate geographical representation; representation of the diversity of knowledge systems; and gender balance. Those Bureau and Panel members with appropriate knowledge who are not authors will act as review editors.

The Chair of the Plenary will provide information to the Plenary on the selection process, including the application of the selection criteria for participation and any other considerations. An approval and adoption procedure will allow the Plenary at its sessions to approve the summary for policymakers on a line-by-line basis and ensure that the summary for policymakers and the full report of the synthesis report are consistent and that the synthesis report is consistent with the underlying assessment reports from which the information has been synthesized and integrated.

Step 1: The full report (30–50 pages) and the summary for policymakers (5–10 pages) of the synthesis report are prepared by the writing team.

Step 2: The full report and the summary for policymakers of the synthesis report undergo simultaneous review by Governments and experts.

Step 3: The full report and the summary for policymakers of the synthesis report are revised by the report co-chairs and lead authors with the assistance of the review editors.

Step 4: The revised drafts of the full report and the summary for policymakers of the synthesis report are submitted to Governments and observer organizations eight weeks before a session of the Plenary.

⁵ Until such time as Governments have designated national focal points, the secretariat will send all communications to existing government contacts.

Step 5: The full report and the summary for policymakers of the synthesis report are submitted for discussion by the Plenary:

- (a) At its session, the Plenary will provisionally approve the summary for policymakers on a line-by-line basis;
- (b) The Plenary will then review and adopt the full report of the synthesis report on a section-by-section basis in the following manner:
 - (i) When changes in the full report of the synthesis report are required, either for the purpose of conforming to the summary for policymakers or to ensure consistency with the underlying assessment reports, the Plenary and the authors will note where such changes are required to ensure consistency in tone and content;
 - (ii) The authors of the full report of the synthesis report will then make the required changes to the report, which will be presented for consideration by the Plenary for review and possible adoption of the revised sections on a section-by-section basis. If further inconsistencies are identified by the Plenary, the full report of the synthesis report will be further refined by its authors with the assistance of the review editors for subsequent review on a section-by-section basis and possible adoption by the Plenary;
- (c) The Plenary will, as appropriate, adopt the final text of the full report of the synthesis report and approve the summary for policymakers.

The synthesis report consisting of the full report and the summary for policymakers should be formally and prominently described as a report of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services.

3.10 Addressing possible errors

The review processes described above should ensure that errors are eliminated well before the publication of Platform reports and technical papers. However, if a reader of an accepted Platform report, approved summary for policymakers or finalized technical paper finds a possible error (e.g., a miscalculation or a factual inaccuracy) the issue should be brought to the attention of the secretariat, which will implement the following process for error correction.

Error correction. The secretariat will in the first instance ask the report co-chairs to investigate and rectify the possible error in a timely manner, reporting back to the secretariat on the conclusion. If the report co-chairs find that an error has been made, the secretariat will notify the Multidisciplinary Expert Panel co-chairs, who will decide on the appropriate remedial action in consultation with the report co-chairs. Appropriate remedial action may include an assessment of the implications of the error and the publication of a provisional correction and an accompanying assessment of the impact of the error on the report and/or its summary for policymakers, to be made available on the Platform website. The correction would be subject to consideration and ratification by the Plenary at its next session. Any correction to the report that is required must be made without undue delay. If no remedial action is deemed necessary, a written justification from the report co-chairs (upon advice from the Multidisciplinary Expert Panel co-chairs and the secretariat) must be provided to the claimant and the Plenary.

4. Clearance processes for technical papers

Technical papers are prepared on scientific, technical and socioeconomic issues that are deemed appropriate by the Plenary. Such papers are:

- (a) Based solely upon material referenced or contained in the accepted and approved assessment reports;
- (b) On topics agreed upon by the Plenary;
- (c) Prepared by a team of lead authors, including a report co-chair, selected by the Multidisciplinary Expert Panel in accordance with the provisions set out in appendix I to the present procedures, on the selection of report co-chairs, lead authors and coordinating lead authors;
- (d) Submitted in draft form for simultaneous review by Governments and experts at least six weeks before their comments are due;

(e) Revised by the report co-chairs and lead authors on the basis of comments received from Governments and experts, with the assistance of at least two review editors per technical paper who are selected in accordance with the procedures for selecting review editors for assessment reports and synthesis reports set out in section 3.6.2 and carry out their roles as described in section 5 of appendix I to the present procedures;

(f) Submitted in revised form to Governments and experts for their review at least four weeks before their comments are due;

(g) Finalized by the report co-chairs and lead authors, in consultation with the Multidisciplinary Expert Panel functioning as an editorial board, based on the comments received.

If necessary, with guidance from the Multidisciplinary Expert Panel, a technical paper may include in a footnote the differing views expressed in comments submitted by Governments during their final review of the document if these are not otherwise adequately reflected in the paper.

The following guidelines should be used in interpreting requirement (a) above. The scientific, technical and socioeconomic information in technical papers shall be derived from:

(a) The text of Platform assessment reports and the portions of material in cited studies that such reports were based on;

(b) Relevant scientific models and their assumptions and scenarios based on scientific, technical and socioeconomic assumptions as were used to provide information in the assessment reports.

Technical papers shall reflect the range of findings set out in the assessment reports and support and/or explain the conclusions drawn in the reports. Information in the technical papers should, as far as possible, include references to the relevant subsections of the relevant assessment reports and other related material.

Sources and consequences of uncertainty should be explicitly delineated, and quantified where possible. The implications of knowledge gaps and uncertainty for decision-making should be discussed.

Technical papers are publicly available and each should contain a prominent declaration that it is a technical paper of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services and, as such, has undergone expert and government review but has not been considered by the Plenary for formal acceptance or approval.

5. Platform supporting material

This section refers to supporting material as defined in section 1.2.

Procedures for the recognition of workshops are set out in sections 6.1 and 6.2. Arrangements for the publication and/or e-publication of supporting material should be agreed upon as part of the process of workshop recognition or such publication should be commissioned by the Multidisciplinary Expert Panel for the preparation of specific supporting material.

Any supporting material as described in subparagraphs (a), (b), (c) and (d) in section 1.2 under “supporting material” should contain a prominent declaration stating that it is supporting material for the Platform and, as such, has not been subjected to the formal Platform review processes.

Guidance material, as described in subparagraph (e) of section 1.2, is intended to assist authors in the preparation of comprehensive and scientifically consistent Platform reports. The preparation of guidance material is usually commissioned by the Plenary and overseen by the Multidisciplinary Expert Panel for consideration by the Platform but is not subjected to the formal Platform review processes.

6. Workshops

6.1 Platform workshops

Platform workshops are defined as meetings that provide support for Plenary-approved activities. Such workshops can focus on:

(a) A specific topic bringing together a limited number of relevant experts;

(b) A cross-cutting or complex topic requiring input from a broad community of experts;

- (c) The provision of training and capacity-building.

Through the secretariat, the Multidisciplinary Expert Panel will request nominations of workshop participants by government-designated national focal points and other stakeholders. The Multidisciplinary Expert Panel may also nominate experts and will select workshop participants. The Panel will function as a scientific steering committee to assist the secretariat in organizing such workshops.

The composition of workshop participants shall aim to reflect:

- (a) The relevant range of scientific, technical and socioeconomic views and expertise;
- (b) Appropriate geographical representation;
- (c) The existing diversity of knowledge systems;
- (d) Gender balance;
- (e) Appropriate stakeholder representation, for example, representatives from the scientific community, Governments, universities, non-governmental organizations and the private sector.

[The Platform will ensure that funding is made available for the participation in workshops of experts from developing countries and countries with economies in transition as well as indigenous and local knowledge holders, as appropriate.]

The list of participants invited to a workshop should be made available to government-designated national focal points and other stakeholders within two weeks of the selection having taken place, including a description of the application of the selection criteria and any other considerations for participation in that regard.

The proceedings of Platform workshops will be made available online and should:

- (a) Include a full list of participants, describing their affiliation;
- (b) Indicate when and by whom they were prepared;
- (c) Indicate whether and by whom they were reviewed prior to publication;
- (d) Acknowledge all sources of funding and other support;
- (e) Indicate prominently at the beginning of the document that the activity was held pursuant to a decision of the Plenary but that such decision does not imply the Plenary's endorsement or approval of the proceedings or any recommendations or conclusions contained therein.

6.2 Co-sponsored workshops

Workshops may be co-sponsored by the Platform if the Bureau and the Multidisciplinary Expert Panel determine in advance that they are supportive of Plenary-approved activities. Co-sponsorship by the Platform of a workshop does not necessarily convey any obligation by the Platform to provide financial or other support. In considering whether to extend Platform co-sponsorship to a workshop, the following factors should be taken into account:

- (a) Implications for the reputation of the Platform;
- (b) Multidisciplinary Expert Panel involvement in the steering committee for the design and organization of, and selection of experts for, the workshop;
- (c) Level of funding for the activity available from sources other than the Platform;
- (d) Whether the activity will be open to government experts as well as experts from other stakeholder entities, including non-governmental organizations, and indigenous and local knowledge holders participating in the work of the Platform;
- (e) [Whether provision will be made for the participation of experts from developing countries and countries with economies in transition;]
- (f) Whether the proceedings will be published and made available to the Platform in a time frame that is relevant to its work;
- (g) Whether the proceedings will:
 - (i) Include a full list of participants and affiliation;
 - (ii) Indicate when and by whom they were prepared;

- (iii) Indicate whether and by whom they were reviewed prior to publication;
- (iv) Specify all sources of funding and other support;
- (v) Prominently display a disclaimer stating that Platform co-sponsorship does not imply Platform endorsement or approval of the proceedings or any recommendations or conclusions contained therein, and that neither the papers presented at the workshop nor the report of its proceedings have been subjected to Platform review.

7. Nomination and selection process for task forces

The secretariat will request nominations from Governments and invite relevant stakeholders⁶ to present names of experts to participate in task forces. The secretariat will compile lists of such nominations, which will be made available to the Multidisciplinary Expert Panel and the Bureau.

The Multidisciplinary Expert Panel and the Bureau will then select experts from the lists of nominations.

⁶ In the context of these procedures, relevant stakeholders are qualified national, regional and international scientific organizations, centres of excellence and institutions known for their work and expertise, including experts on indigenous and local knowledge on issues related to the Platform's functions and programme of work.

Appendix I

Tasks and responsibilities of report co-chairs, coordinating lead authors, lead authors, contributing authors, review editors and expert reviewers of Platform reports and other deliverables and of government-designated national focal points

1. Report co-chairs

Function:

To assume responsibility for overseeing the preparation of an assessment report or synthesis report.

Comment:

Report co-chairs are responsible for ensuring that a report is completed to the highest scientific standard. The names of all report co-chairs will be acknowledged prominently in the reports that they are involved in preparing.

Report co-chairs are nominated and selected as described in sections 3.6.1 and 3.6.2 of the procedures.

2. Coordinating lead authors

Function:

To assume overall responsibility for coordinating major sections and/or chapters of an assessment report.

Comment:

Coordinating lead authors are lead authors who have the added responsibility of ensuring that major sections and/or chapters of a report are completed to a high standard and are completed and delivered to the report co-chairs in a timely manner and conform to any overall standards of style set for the document.

Coordinating lead authors play a leading role in ensuring that any cross-cutting scientific, technical or socioeconomic issues of significance to more than one section of a report are addressed in a complete and coherent manner and reflect the latest information available. The skills and resources required of coordinating lead authors are similar to those required of lead authors together with the additional organizational skills needed to coordinate a section, or sections, of a report. All coordinating lead authors will be acknowledged in the reports.

3. Lead authors

Function:

To assume responsibility for the production of designated sections or parts of chapters that respond to the work programme of the Platform on the basis of the best scientific, technical and socioeconomic information available.

Comment:

Lead authors typically work in small groups that are responsible for ensuring that the various components of their sections are put together on time, are of a uniformly high quality and conform to any overall standards of style set for the document.

The role of lead authors is a demanding one and, in recognition of this, lead authors will be acknowledged in final reports. During the final stages of report preparation, when the workload is often particularly heavy and when lead authors are heavily dependent upon each other to read and edit material, and to agree to changes promptly, it is essential that their work should be accorded the highest priority.

The essence of the lead authors' role is to synthesize material drawn from the available literature or other fully-justified unpublished sources as defined in section 3.6.3 of the procedures.

Lead authors must have a proven ability to develop text that is scientifically, technically and socioeconomically sound and that faithfully represents, to the greatest extent possible, contributions made by a wide variety of experts and adheres to the overall standards of style set for a document. When revising text, lead authors and review editors are required to take account of the comments made during reviews by Governments and experts. The ability to work to deadlines is a necessary practical requirement.

Lead authors are required to record in the report views that cannot be reconciled with a consensus view⁷ but are, nonetheless, scientifically, technically or socioeconomically valid.

Lead authors are encouraged to work with contributing authors, using electronic means as appropriate, in the preparation of their sections or to discuss expert or government comments.

4. Contributing authors

Function:

To prepare technical information in the form of text, graphs or data for inclusion by the lead authors in the relevant section or part of a chapter.

Comment:

Input from a wide range of contributors is key to the success of Platform assessments. The names of all contributors will therefore be acknowledged in the Platform's reports. Contributions are sometimes solicited by lead authors but unsolicited contributions are also encouraged. Contributions should be supported, as far as possible, with references from the peer-reviewed and internationally available literature and with copies of any unpublished material cited along with clear indications of how to access the latter. For material available in electronic format only, the location where such material may be accessed should be cited. Contributed material may be edited, merged and, if necessary, amended in the course of developing the overall draft text.

5. Review editors

Function:

To assist the Multidisciplinary Expert Panel in identifying reviewers for the expert review process, ensure that all substantive expert and government review comments are afforded appropriate consideration, advise lead authors on how to handle contentious or controversial issues and ensure that genuine controversies are adequately reflected in the text of the report concerned.

Comment:

In general, there will be two review editors per chapter, including its executive summary. In order to carry out the tasks allocated to them, review editors will need to have a broad understanding of the wider scientific, technical and socioeconomic issues being addressed.

The workload for review editors will be particularly heavy during the final stages of report preparation, including attending meetings at which writing teams consider the results of the review rounds.

Review editors are not actively engaged in drafting reports and may not serve as reviewers for text that they have been involved in writing. Review editors may be drawn from among members of the Multidisciplinary Expert Panel, the Bureau or other experts as agreed by the Panel. Although responsibility for the final text of a report remains with the relevant coordinating lead authors and lead authors, review editors will need to ensure that where significant differences of opinion on scientific issues remain, such differences are described in an annex to the report.

Review editors must submit written reports to the Multidisciplinary Expert Panel and, where appropriate, will be requested to attend meetings convened by the Multidisciplinary Expert Panel to communicate their findings from the review process and to assist in finalizing summaries for policymakers and, as necessary, synthesis reports. The names of all review editors will be acknowledged in the reports.

6. Expert reviewers

Function:

To comment on the accuracy and completeness of the scientific, technical and socioeconomic content and the overall balance between the scientific, technical and socioeconomic aspects of the drafts.

⁷ Consensus does not imply a single view, but can incorporate a range of views based on the evidence.

Comment:

Expert reviewers comment on text according to their knowledge and experience. The names of all expert reviewers will be acknowledged in the reports.

7. **Government and observer organization focal points**

Function:

To prepare and update the list of national experts required to assist in the implementation of the Platform's work programme, and to arrange for the provision of integrated comments on the accuracy and completeness of the scientific, technical and/or socioeconomic content and the overall balance between scientific, technical and/or socioeconomic aspects of the drafts.

Comment:

Government review will typically be carried out among a number of departments and ministries. For administrative convenience, each Government and observer organization should designate one focal point for all Platform activities, providing full contact information for the focal point to the secretariat and notifying the secretariat of any changes in the information. Focal points should liaise with the secretariat regarding the logistics of the review processes.

Appendix II

Procedure on the use of literature in the reports of the Platform

The present appendix is provided to ensure that the Platform's process for the use of literature is open and transparent. In the assessment process, emphasis is to be placed on the assurance of the quality of all cited literature. Priority should be given to peer-reviewed and publicly available scientific, technical and socioeconomic literature, including assessment reports such as those produced for the Platform. The procedure for the recognition and incorporation of indigenous and local knowledge is discussed in appendix III to the procedures for the preparation of Platform deliverables.

It is recognized that, besides this peer-reviewed and publicly available literature, other diverse sources⁸ provide crucial information for Platform reports. These sources may include reports by Governments, industry and research institutions, international and other organizations, or on conference proceedings. In addition, valuable information will be sourced from the "supporting material" prepared for the consideration of the Platform (annex I, sect. 1.2). The use of such diverse sources, however, brings with it an extra responsibility for the author teams in ensuring the quality and validity of cited sources and information. In general, newspapers and magazines, blogs, social networking sites and broadcast media are not acceptable sources of information for Platform reports. Personal communications providing scientific results are also not acceptable sources.

The following additional procedures are specified:

1. Responsibilities of coordinating, lead and contributing authors

The coordinating lead authors will ensure that all sources are selected and used in accordance with the procedures set out in the present appendix.

The author team is required to critically assess information from any source considered for inclusion in a report. Each author team should review the quality and validity of each source before incorporating information from that source into a Platform report. Authors who wish to include information that is not publicly available are required to send the full reference for and a copy of the information, preferably electronically, to the relevant technical support unit and the Platform secretariat. With regard to materials available in electronic format only, the location where such material may be accessed and a soft copy of such material should be sent to the technical support unit, and to the secretariat for archiving. In the case of a source written in a language other than English, an executive summary or abstract in English facilitated by the relevant technical support unit is required.

These procedures also apply to papers undergoing the publication process in peer-reviewed journals at the time of Government or expert review. Such papers must have been accepted for publication by the journal prior to the final distribution to Governments of the report and the summary for policymakers

⁸ Historically termed "grey literature".

for which they have been used. If that is not the case, the material and any arguments reliant on it must be withdrawn from the report, as well as from its technical summary and its summary for policymakers.

All sources will be included in the reference section of the relevant Platform report.

2. Responsibilities of the review editors

The review editors will provide support and guidance to the author team in ensuring the consistent application of the procedures set out in the present appendix.

3. Responsibilities of the technical support unit

For sources that are not publicly available, the technical support unit responsible for the coordination of the report, in consultation with the report co-chairs, will make these sources available to reviewers who request them during the review process and send the material to the Platform secretariat for archiving.

4. Responsibilities of the Platform secretariat

The Platform secretariat will store sources that are not publicly available. The secretariat should archive the location where material available in electronic format only may be accessed and a soft copy of such material. It should provide access to these materials on request. Storage procedures will comply with protocols and guidelines to be agreed under the Platform's data and information management plan (decision IPBES-3/1, annex II).

Appendix III

Procedures for bringing indigenous and local knowledge into the Platform's assessments

The procedures outlined below originate from the stated aim of the Platform to include indigenous and local knowledge in all aspects of its work. Accordingly, the Multidisciplinary Expert Panel should encourage Governments and stakeholders to nominate an appropriate number of indigenous and local knowledge holders and indigenous and local knowledge experts to contribute to Platform deliverables. Furthermore, the Multidisciplinary Expert Panel should work to ensure that indigenous and local knowledge, and an appropriate number of indigenous and local knowledge holders and indigenous and local knowledge experts, are included in all stages of the Platform's assessments. In accordance with applicable international obligations and national legislation, nothing in these procedures should be construed as diminishing or extinguishing any existing rights of indigenous peoples or local communities.

1. Receiving requests to the Platform

When submitting inputs, requests and suggestions for Platform attention and action in line with the procedure for receiving and prioritizing requests put to the Platform, Governments, multilateral environmental agreements, United Nations bodies and other stakeholders are encouraged to take into account relevant indigenous and local knowledge and the concerns and priorities of indigenous and local knowledge holders and indigenous and local knowledge experts.

The annex to decision IPBES-1/3 sets out the procedure for receiving and prioritizing requests put to the Platform. In addition to the information already identified in paragraph 7 of the procedure, which outlines the information that should accompany requests, requests should also, where relevant, be accompanied by information about the availability of relevant indigenous and local knowledge and the potential contribution of indigenous and local knowledge holders and indigenous and local knowledge experts.

2. Scoping for Platform deliverables

The procedures for the preparation of Platform deliverables⁹ include guidance on defining the scope and objective of a deliverable and the information, human and financial requirements to achieve the objective. The Panel selects experts to carry out the scoping, including determination of the outline, costs and feasibility. In order for indigenous and local knowledge to be appropriately included in the Platform's assessments, it is important that the requisite indigenous and local knowledge experience

⁹ Decision IPBES-3/3, annex I.

and expertise are available during the scoping phase in order to allow for the co-design of the assessment based on diverse knowledge systems, including indigenous and local knowledge systems.

(a) Nomination of experts

The Multidisciplinary Expert Panel, when requesting nominations of experts for a detailed scoping, should encourage Governments and stakeholders to nominate indigenous and local knowledge holders and indigenous and local knowledge experts and when appropriate to utilize the roster of indigenous and local knowledge holders and experts provided by the Platform.

(b) Selection of experts

The composition of the group of experts for a scoping should reflect the diversity of knowledge systems that exist. When making its selection for a detailed scoping (decision IPBES-3/3, annex I, sects. 3.1.(f) and 3.3.(f)), the Multidisciplinary Expert Panel should ensure that the scoping team includes an appropriate number of indigenous and local knowledge holders and indigenous and local knowledge experts. In the event that the composition falls short of expectations, the Multidisciplinary Expert Panel can consult the roster of indigenous and local knowledge holders and indigenous and local knowledge experts in order to identify additional individuals who can fill the gap in indigenous and local knowledge experience and expertise in the scoping team. The procedure for filling gaps in the availability of experts for thematic or methodological assessments¹⁰ should be followed.

3. Preparation of reports

The procedures for the preparation of Platform deliverables¹¹ contain, in sections 3.5 and 3.6, a series of steps for the preparation of reports, including the nomination and selection of author teams, the preparation of draft reports and the review of draft reports.

(a) Nomination and selection of experts for assessment teams

Nomination of experts

The Multidisciplinary Expert Panel, when requesting through the Platform secretariat nominations of experts to act as coordinating lead authors, lead authors or review editors, could encourage Governments and stakeholders to nominate indigenous and local knowledge holders and indigenous and local knowledge experts and/or to utilize the roster of indigenous and local knowledge holders and indigenous and local knowledge experts.

Selection of experts

The composition of the group of coordinating lead authors and lead authors for a given chapter, report or summary should reflect the diversity of knowledge systems as appropriate (decision IPBES-3/3, annex I, sect. 3.6.2). When making its selection, the Panel should aim to include within the author teams for relevant chapters an appropriate number of authors who are indigenous and local knowledge holders and indigenous and local knowledge experts. If there are gaps in indigenous and local knowledge expertise, the Panel, in collaboration with the assessment co-chairs, can consult the roster of indigenous and local knowledge holders and indigenous and local knowledge experts. The procedure for filling gaps in the availability of experts for thematic or methodological assessments should be followed.

(b) Preparation of draft reports

Identification of relevant sources of indigenous and local knowledge

While mainstream scientific resources provide access to some indigenous and local knowledge literature, the indigenous and local knowledge field also has its own dedicated journals, search engines, databases and networks that differ from those generally consulted in the fields of ecology, biodiversity and economics. Indigenous and local knowledge holders and indigenous and local knowledge experts on an author team should identify the indigenous and local knowledge resources that are most relevant to their assessment. They should be invited to use annotated lists of key indigenous-and-local-knowledge-relevant resources if such lists are developed in the framework of the Platform's assessments.

¹⁰ Decision IPBES-4/3, annex I.

¹¹ Decision IPBES-3/3, annex I.

(c) **Review**

Expert reviews

Indigenous and local knowledge holders and indigenous and local knowledge experts who have contributed in situ knowledge to an assessment may use their own community-based validation and documentation processes. In order to ensure the review process is user friendly, comments may be submitted in flexible formats.

Review editors

The Panel should make every effort to include an appropriate number of review editors with indigenous and local knowledge experience and expertise on each assessment team.

If there are gaps in indigenous and local knowledge expertise in the team of review editors, the Panel, in collaboration with the assessment co-chairs, can consult the roster of indigenous and local knowledge holders and indigenous and local knowledge experts in order to identify individuals who can fill such gaps. The procedure for filling gaps in the availability of experts for thematic or methodological assessments should be followed.

4. Preparation of summaries for policy makers

The responsibility for preparing first drafts and revised drafts of summaries for policymakers lies with the report co-chairs and an appropriate representation of coordinating lead authors and lead authors (decision IPBES-3/3, annex I, sect. 3.8). The Panel should ensure that an appropriate number of individuals with indigenous and local knowledge experience and expertise are included in author teams for summaries for policymakers.

5. Preparation of synthesis reports

The writing teams for synthesis reports could be composed of report co-chairs, coordinating lead authors and Panel and Bureau members (decision IPBES-3/3, annex I, sect. 3.9). The Panel should ensure that writing teams include an appropriate number of individuals with indigenous and local knowledge experience and expertise.
